

The Categories made for the online store consists of clothing, exercise tools, kitchenware, outdoor supplies, and Electronics. The program operates by having the user select which category it wants to look upon. First the program will output a welcome to you. "Hello and welcome to cheap mart!" Once you have been introduced the program will give you access to the five categories of shopping that we created for the user. Users will then be able to choose which category to shop and buy from.

The program will then use continuation statements to get the shopper through the website efficiently and quickly, ensuring the shopper finds what they need.

Every category was made using the product names, details, price, quantity, and cart methods.

The program will let the user add the items they want to buy; to the cart.
